IMPORTANT DATES**Workshop/SS Proposal Due:** Jun. 06, 2025**Regular Paper Submission Due:** Jun. 20, 2025**WiP/Poster/Wksp/SS Paper Due:** Jun. 27, 2025**Author Notification:** Aug. 11, 2025**Camera-ready Submission Due:** Sep. 12, 2025**CyberSciTech 2025****The 10th IEEE Cyber Science and Technology Congress****October 21-24, Hakodate, Japan**<http://cyber-science.org/2025/cyberscitech/>**Transforming the Future by Disruptive Cyber Technologies**

Cyberspace, the seamless integration of physical, social, and mental spaces, is an integral part of our society, ranging from learning and entertainment to business and cultural activities, and so on. There are, however, a number of pressing challenges such as safety and trust associated with the cyberspace. For example, how do we strike a balance between the need for strong cybersecurity and preserving the privacy of ordinary citizens?

To address these challenges, there is a need to establish new science and research portfolios that incorporate cyber-physical, cyber-social, cyber-intelligent, and cyber-life technologies in a cohesive and efficient manner. This is the aim of the IEEE Cyber Science and Technology Congress (CyberSciTech). IEEE CyberSciTech has been successfully held in Auckland, New Zealand, 2016, in Orlando, USA, 2017, in Athens, Greece, 2018, in Fukuoka, Japan, 2019, in Calgary, Canada, 2020 and 2021 (online due to COVID-19), in Calabria, Italy, 2022, in Abu Dhabi, UAE, 2023, and in Boracay Island, Philippines, 2024.

In 2025, we will continue to offer IEEE CyberSciTech with the aim of providing a common platform for scientists, researchers, and engineers to share their latest ideas and advances in the broad scope of cyber-related science, technology, and application topics. In addition, this is also a platform to allow relevant stakeholders to get together, discuss and identify ongoing and emerging challenges, in order to understand and shape new cyber-enabled worlds.
